  Next.js With Tailwind CSS-Build a Frontend Ecommerce Project

SKILL

- Web Design
- Design Thinking
- Front End Coding
- Backend Tech
- Problem-Solving
- Project Management Tools

PROFILE

Passionate and detail-oriented Full-Stack Developer with strong expertise in both frontend and backend development. Skilled in building responsive, user-focused web applications using React, Next.js, and Tailwind CSS on the front end, and Node.js, Express, and PostgreSQL/MongoDB on the back end. Adept at translating ideas into efficient, scalable solutions that enhance user experience and performance. Experienced in working with RESTful APIs, authentication systems, and version control (Git). Driven by continuous learning and teamwork, with a focus on clean code and modern development practices.

💻 PROJECTS

Blue Nile Booking App

- Created a responsive and scalable application for booking services and managing appointments.
- Frontend built with Next.js, offering dynamic and SEO-friendly pages.
- Backend developed with Node.js and MongoDB for flexible data handling.
- Added email notifications, calendar sync, and admin dashboards.
- Deployed on Vercel (frontend) and Render (backend).

Hulu School Tutoring Company

Developed a full-stack web platform that connects students with tutors for online and in-person sessions.

- Built an intuitive user interface using React and Tailwind CSS.
- Implemented real-time scheduling and booking features with Node.js and Express.
- Integrated JWT authentication and role-based access for tutors and students.
- Used PostgreSQL for structured data storage and RESTful APIs for communication.

Bruh Lifelog App

Developed a personal productivity and wellness tracker to log daily habits and reflections.

- Built with Next.js (frontend) and Node.js/Express (backend).
- Integrated MongoDB Atlas for cloud data storage.
- Added features like activity tracking, data visualization, and user login.
- Prioritized clean UI and smooth user experience across devices.

E-Commerce App

Designed and built a full-featured online store with secure payment and product management.

- Used React and Redux for state management and seamless UI.
- Implemented Express.js backend with Stripe API for payments.
- Supported user authentication, cart, orders, and product CRUD operations.
- Focused on responsive design and performance optimization.
